

Leonardo Silvatti Silva

Senior Front-End Engineer | Product Team Lead | Full-Stack Collaborator

Location: São Paulo, Brazil (GMT-3) • Phone: +55 14 99678-3741 • Email: leonardo@silvatti.com.br • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Front-End Engineer and Product Team Lead with 7+ years of experience designing and delivering scalable, high-traffic web platforms across SaaS, e-commerce, ERP, and subscription products. Expert in React, Next.js, TypeScript, JavaScript, HTML5, CSS3, SASS, and modern frontend architecture, with a proven track record in legacy migration, SEO, performance optimization, responsive UI development, and accessible user experiences.

Experienced in technical roadmap planning, stakeholder alignment, team mentoring, and cross-functional leadership, while collaborating closely with backend teams on APIs, integrations, data flows, and business-facing product delivery. Strong full-stack collaboration profile with a focus on web application architecture, product growth, and engineering execution.

CORE COMPETENCIES

- Front-End Development: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Tailwind CSS, Responsive Design, Accessibility (WCAG), Component Architecture, Frontend Performance, SEO, Design Systems.
- Product & Management: Technical Roadmap, Product Strategy, Agile/Scrum, Stakeholder Management, Cross-Functional Leadership, Team Mentoring, Code Review, Delivery Planning, Business Prioritization.
- Full-Stack Collaboration: REST APIs, API Integration, Backend Collaboration, Data Flow Design, Business Logic Alignment, PHP, RabbitMQ, Deployment Workflows, CI/CD.
- Quality & Delivery: Jest, Cypress, React Testing Library, Storybook, Git, GitHub, GitLab, Vercel, AWS, Docker, Webpack, Vite, Testing Automation, Performance Optimization.
- AI-Augmented Development: Claude (Opus, Sonnet, Haiku), Cursor, GitHub Copilot, Prompt Engineering.
- Languages: Portuguese (Native), English (Advanced), Spanish (Intermediate).

PROFESSIONAL EXPERIENCE

Trustly | Remote / Brazil

Senior Front-End Engineer | May 2026 - September 2026

- Developed and maintained customer-facing features for the product widget and lightbox using React, TypeScript, Next.js, and Tailwind CSS.
- Improved checkout and payment experience for merchants and end users by optimizing responsiveness, usability, and error-state handling across critical payment flows.
- Collaborated with product, design, and engineering stakeholders to prioritize frontend improvements with measurable impact on conversion, usability, and customer experience.
- Added and maintained automated tests to support quality, stability, and regression prevention across critical user journeys.

eSapiens Technology | Remote / Brazil

Product Team Lead & Tech Lead | January 2025 - February 2026

- Led technical strategy and delivery for high-traffic platforms, translating business requirements into scalable engineering solutions and maintaining alignment across product, design, and development teams.
- Managed roadmap prioritization, dependency planning, and engineering execution for product initiatives while supporting stakeholder communication and delivery accountability.
- Introduced AI-assisted development workflows using Claude and Cursor to accelerate API integrations, frontend scaffolding, and boilerplate generation while preserving rigorous code quality review standards.
- Increased team delivery velocity by 30% by removing bottlenecks, standardizing engineering practices, and mentoring engineers on architecture and code quality.

- Partnered with backend teams on API contracts, integrations, and data flows to support reliable product delivery and faster iteration cycles.

Senior Front-End Engineer | July 2021 - January 2025

- Architected and executed the migration of the Astrolink platform from AngularJS/PHP to React and Next.js, improving performance, maintainability, and SEO for more than 15 million users.
- Built reusable, accessible, and scalable UI components in TypeScript and SASS, improving consistency, maintainability, and delivery speed across the platform.
- Delivered high-impact growth initiatives, including conversion-focused features, responsive landing pages, and user flows aligned with commercial goals.
- Designed and developed a new One-Time Sale (OTS) product from concept to launch, leading frontend implementation and collaborating with backend teams on use-case definition and API design.
- Increased monthly revenue by 20% through product expansion and improved conversion paths across the user journey.
- Maintained legacy PHP modules while supporting a gradual modernization strategy, ensuring zero downtime and a stable customer experience.

Alternativa Systems | Bauru, Brazil

Front-End Engineer | March 2021 - July 2021

- Developed a cloud-based web version of a desktop ERP system using Next.js and SASS, improving usability and accessibility for enterprise customers.
- Integrated RabbitMQ workflows and asynchronous data processing to support more than 100 enterprise clients and improve operational efficiency.
- Modernized internal operational tools with Vue.js and CSS, reducing friction in internal workflows and improving product management efficiency.

Cocreare | Bauru, Brazil

Front-End Engineer | January 2020 - March 2021

- Built responsive web and mobile applications using React Native, Ionic, React, Vue, and Angular with LESS preprocessing.
- Collaborated directly with design teams to transform high-fidelity Adobe XD and Figma prototypes into production-ready frontend experiences.
- Supported cross-platform UI implementation and feature delivery to improve consistency across web and mobile products.

EDUCATION

Bachelor of Computer Science, São Paulo State University (UNESP) | Bauru, Brazil | 2016 - 2022
