PROFESSIONAL SUMMARY

Senior Front-End Engineer and Tech Lead with 7+ years of experience designing scalable, high-traffic web platforms. I specialize in the modern JavaScript ecosystem (React, Next.js, TypeScript) and have a strong track record of migrating legacy systems, optimizing web performance, and building robust UI architectures.

Beyond frontend, my technical scope includes full-stack development and infrastructure. I have hands-on experience integrating frontend applications with Java backends, utilizing tools like Supabase, Docker, and cloud environments (such as OCI and AWS) to ensure reliable end-to-end delivery.

I am driven by product growth and team efficiency, having previously managed technical roadmaps, mentored developers, and integrated AI-augmented workflows (Claude, Cursor) to accelerate engineering velocity while maintaining strict code quality.

CORE COMPETENCIES

- **Frontend Development:** React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, SASS, Component Architecture, Web Performance, Technical SEO (JSON-LD), Accessibility (WCAG).
- **Backend & Infrastructure:** Java, Node.js, Next Actions, REST APIs, RabbitMQ, Docker, Supabase, Cloudflare, Vercel, OCI, AWS, CI/CD, Git.
- **Leadership & Product:** Technical Roadmap, Agile/Scrum, Stakeholder Management, Team Mentoring, Code Review, Delivery Planning, AI-Augmented Development (Claude, Cursor, Copilot).
- **Quality Assurance:** Jest, Cypress, React Testing Library, Storybook.
- **Languages:** Portuguese (Native), English (C2 Proficient - EF SET), Spanish (Intermediate).

PROFESSIONAL EXPERIENCE

Trustly | Remote / Brazil

Frontend Developer | May 2026 - September 2026

- Collaborated on the full-stack development of critical payment systems, integrating the core widget in React, Next.js, and TypeScript with robust Java-based backend services.
- Ensured the stability and scalability of complex checkout flows, supporting secure transactions for multiple merchant partners and thousands of end-users.
- Architected and implemented comprehensive automated testing workflows, focused on preventing regressions in highly sensitive financial journeys.

eSapiens Technology | Remote / Brazil

Tech Lead / Product Owner | January 2025 - February 2026

- Acted in a hybrid leadership role, managing the technical roadmap and ensuring architectural alignment between engineering, design, and business stakeholders.
- Streamlined agile processes and eliminated technical blockers, increasing the team's delivery velocity by 30%.
- Introduced AI-augmented workflows utilizing Claude and Cursor to accelerate API integrations and boilerplate generation, maintaining strict code quality standards.
- Collaborated with backend teams to define API contracts, data flows, and scalable architecture solutions.

Frontend Developer | July 2021 - January 2025

- Architected and led the migration of the Astrolink platform from legacy AngularJS/PHP to a modern React and Next.js stack, serving over 15 million users and significantly improving SEO and performance.
- Developed a core monetization feature (One-Time Sale) from concept to launch, contributing to a 20% increase in monthly revenue.
- Maintained legacy PHP modules to ensure zero downtime during the progressive stack modernization.
- Engineered reusable, accessible UI components using TypeScript and SASS, improving team delivery speed and consistency.

Alternativa Systems | Bauru, Brazil

Frontend Developer | March 2021 - July 2021

- Engineered the cloud-based web version of a desktop ERP system utilizing Next.js and SASS.
- Integrated RabbitMQ workflows for asynchronous data processing to support concurrent transactions for over 100 enterprise clients.
- Modernized internal operational tools using Vue.js, optimizing internal workflows and product management efficiency.

Cocreare | Bauru, Brazil

Junior Frontend Developer | January 2020 - March 2021

- Built and deployed responsive web and mobile applications using React Native, Ionic, React, Vue, and Angular.
- Collaborated closely with design teams to translate high-fidelity Figma and Adobe XD prototypes into production-ready frontend code.

RECENT PROJECTS

Jornada da Psique | 2026

- Architected and developed a modern blog and web application utilizing Next.js (App Router) and Tailwind CSS.
- Integrated Sanity as a headless CMS for scalable content management and implemented strict technical SEO practices, including JSON-LD structured data. Deployed via Cloudflare for optimized edge performance.

Autoria Marginal | July 2026

- Full-stack web application built to distribute an illustrated copyright guide.
- Developed utilizing Next.js and Server Actions for backend logic without a decoupled API, managing database mutations with Supabase. Deployed via Cloudflare.

Personal Portfolio Web Platform | March 2026

- Architected and developed a high-performance personal portfolio utilizing React, Next.js, and TypeScript.
- Deployed via Vercel with a focus on component architecture, modern responsive UI, and technical SEO optimization.

EDUCATION

Bachelor of Computer Science, São Paulo State University (UNESP) | Bauru, Brazil | 2016 - 2022
